LMS - Land Lease Request Initiation & Approval Workflow

Proposed vendor development specification | Mari Energies Limited

Purpose

The Land Management System (LMS) shall provide a role-based land lease request initiation, approval, and assignment workflow. Land requirements must be justified, approved by the competent authority, and routed to the relevant Land Affairs team.

1. Approval Flow

1. Initiator / Requesting Department
Create request: area, location, project, required date and justification

↓

2. Director Operations
Approve OR reject with mandatory remarks

↓

If rejected
Return to original initiator for revision / resubmission

↓

If approved: 3. Regional Manager
Regional Manager Sindh or relevant concession / field Regional Manager

↓

4. Deputy Manager / Team Leader Land Affairs
Receive assignment and initiate land processing

2. Mandatory Request Fields

Field	Requirement
Request ID	Auto-generated unique number
Initiator / Department	Individual or requesting department
Request Date	System-generated
Project / Well Name	Select or enter project
Concession / Field	Select relevant concession
Location	Province, District, Taluka / Tehsil, Deh / Moza, as available
Land Area Required	Acres and Ghunta
Land Purpose	Well, Rig Camp, Flare Pit, ROW, Pipeline, Access Road, Facility, etc.
Requirement Type	New lease, extension, or additional area
Required Possession Date	Expected date

Field	Requirement
Justification / Remarks	Mandatory
Attachments	Location map, KMZ, layout, survey and supporting documents

3. Approval Matrix

Stage 1 - Initiator / Department: Create and submit request

Stage 2 - Director Operations: Approve or reject with remarks

Stage 3 - Regional Manager: Review approved request and forward to Land Affairs

Stage 4 - Deputy Manager / Team Leader Land Affairs: Accept and initiate land processing

4. Vendor Development Requirements

1. No request shall proceed to the Regional Manager without Director Operations approval.
2. Rejected requests automatically return to the original initiator with mandatory remarks.
3. Approved requests route to the Regional Manager based on concession / field.
4. Regional Manager forwards to the Deputy Manager / Team Leader Land Affairs.
5. Automatic system / email notifications at approval, rejection and assignment stages.
6. Audit trail captures Request ID, user, date / time, action, remarks and approval history.
7. Initiator and authorized management can view current status and responsible officer.
8. All subsequent actions remain linked to the original Request ID; prevent duplicate requests.

5. Proposed Request Statuses

1. Draft
2. Submitted - Director Operations Approval Pending
3. Returned / Rejected by Director Operations
4. Approved - Regional Manager Action Pending
5. Forwarded to Land Affairs
6. Land Processing Initiated

Scope note: This covers the initial land request approval and assignment process only. Survey, landowner verification, negotiation, lease preparation, compensation assessment, PR / PO processing, payment approvals and possession shall form a separate linked workflow under the same Request ID.
