LMS Module Workflow — Quick Reference

For the presenter. Each module lists **who signs in, where to click, what to pick, what happens**, and how it connects to the other modules. The values to type are in **09 Demo Data Sheet** (same section numbers).

0. Accounts, switching, tips

Switch account: top-right name → **Sign out** → on the sign-in page click the next account (demo mode lists every account with its password). Faster: keep **one incognito window per account**. **Province:** after sign-in pick it on *Select province*; change it later with the province chip in the header (e.g. **Sindh** ▾).

Sign in as	Person	Position	Province	Acts in (section)
`admin`	Asma Rahim	System Administrator	all	1 Users, 21 Settings, 20 Audit
`director`	Asif Rehman	Director (demo): every business position	all	anything, one step per record; **not** cheque release
`explorer`	Usman Ghani	Exploration Planner	SND	5 draws land requests
`dirops`	Javed Akhtar	Director Operations	all	5 tier 1
`regmgr`	Sadia Memon	Regional Manager	SND	5 tier 2
`landaffairs`	Zubair Soomro	DM / TL Land Affairs	SND	5 tier 3
`lofield`	Sanaullah Khoso	Land Officer (Field)	SND	creates records in 2–10, 12–17; hand-over (5)
`nego`	Bilal Chandio	Negotiation Group	SND	6 Negotiation, 7 Checked, 16 In Progress
`legal`	Ayesha Siddiqui	Legal Advisor	all	7 Reviewed, 13 cases, 14 Legal Cleared, 15 Legal Follow-up
`sradmin`	Faisal Shaikh	Sr. Administrator LMS (Field)	SND	6 Handover, 7 Verified, 8/9 Under Review, 10 Referred, 14 Revenue Verified, 15 Assessed, 16 Resolved
`dmfield`	Nadia Baig	DM / Team Lead (Field)	SND	6 Approval, 7 Field Approved, 15 Action Approved, 16 Assigned
`mland`	Imran Qadir	Manager Land (HO)	all	final approvals in 6–10, 14–16; **cheque release**; lifts stays; budgets
`finance`	Shazia Noor	Finance Officer	all	12 **Verify**, holds, cancel voucher, receipts; budgets
`audit`	Tariq Mehmood	Internal Audit	all	20 read-only + Audit Trail
`viewer`	Hina Jamal	—	all	read-only, CNIC masked

Same jobs in other provinces: `loquetta`, `negoqta`, `sradmqta`, `dmqta`, `regmgrqta`, `landaffqta`, `explorerqta` (Balochistan); `lopnj`, `sradmpnj`, `regmgrpnj`, `landaffpnj` (Punjab + KPK).

Tips

- **Click a row** (not its buttons) → the record's details open; **Close** or **Esc** shuts them.
- The → **next stage** button appears only for the position that owns that step. Everyone else sees **"Waiting on <position>"** on the row. Pressing it opens a box: type a **Note** → **Move to <stage>**.
- **Separation of duties:** whoever created a record cannot approve it, and one person takes only one step of the same record. That is why the creator (`lofield`) never does the next step.
- **Cancel / Stop** on a row (cases, acquisitions, mutations; DBPFC and ROW: Stop) needs a reason and is open to anyone who may edit that module.
- **Release cheque**, holds and **Cancel voucher** ask for the password again when the sign-in is older than **10 minutes**.

---

1. Users & Roles

What it is: accounts, roles, provinces and approval positions. **Menu:** System → Users & Roles.

#	Sign in as	Go to	Do	Result
1	`admin`	Users & Roles	**+ Add User** → *Username*, *Full name*, *Email*, *Department*, *Position*, *Office* → *Roles*, *Provinces*, *Approval positions* (multi-select) → **Create and get invitation link**	link shown; copy it to the person
2	`admin`	click the user's row	details: account, work, roles, 2-step, sessions → **Access** (role end date "valid until"), **Edit**, **Status**	changes are audited

How it connects

- `[automatic]` the *Approval positions* given here decide who sees the → button in sections 5–16 (`lms.workflow_step_group`, checked by `api.advance_workflow`).
- `[automatic]` *Provinces* limit what the user sees everywhere (row-level security).
- `[shows in]` Audit Trail (20).

If refused: you cannot change your own roles → another admin does it.

2. Projects / Well Locations

What it is: the well / facility the land is for. **Menu:** Master Data → Projects / Well Locations.

#	Sign in as	Go to	Do	Result
1	`lofield`	Projects / Well Locations	**+ Add Project** → *Project code*, *Province* ▾, *Name*, *Type* ▾, *Block / concession*, *District* ▾, *Required area* → **Save**	project in the list

How it connects

- `[picks]` none (it is the root).
- `[automatic]` every khasra, request, acquisition, case, lease, ROW, DBPFC, budget, voucher, encroachment, grievance and legal case picks a project; the project must be in the same province

(`tg_link_same_province`).
- `[shows in]` Project Dashboard (one page per project), Executive Dashboard, reports.

3. Landowners

What it is: owners, identified by CNIC. **Menu:** Master Data → Landowners.

#	Sign in as	Go to	Do	Result
1	`lofield`	Landowners	**+ Add Landowner** → *Province* ▾, *CNIC* (type the 13 digits), *Full name (as on CNIC)*, *Father / husband name*, *Owner type* ▾, *Tax status* ▾ (Filer / Non-Filer), IBAN, *Bank branch* → **Save**	code e.g. SND-0000NN
2	`lofield`	click the owner's row	**Statement**: owed, paid, balance (payment lines only for payment roles)	—

How it connects

- `[picks]` none.
- `[automatic]` *Tax status* sets the withholding tax on every voucher to this owner: Filer 10 %, Non-Filer 20 % (`finance.wht_pct` × `finance.wht_nonfiler_multiplier`).
- `[automatic]` a **Deceased** owner cannot be paid until a Virasat mutation (14).
- `[shows in]` shares (4), case owners (7), lessor (8), payee (12), legal stay (13), mutation (14), Landowner Register (20).

If refused: "A landowner with this CNIC is already registered" → open the existing owner.

4. Survey / Khasra Register + Shares

What it is: the parcel and who owns which share. **Menu:** Master Data → Survey / Khasra Register.

#	Sign in as	Go to	Do	Result
1	`lofield`	Survey / Khasra Register	**+ Add Survey** → *Province* ▾, *Revenue location* (district → taluka → deh), *Project* ▾, *Survey / khasra no.*, *Block no.*, *Land class* ▾, *Recorded area* + *Recorded unit* ▾ (province units listed first), *Latitude*, *Longitude* → **Save**	AREA-0000NN, area in acres
2	`lofield`	the khasra's row → **Shares**	*Landowner to add* → type 3 letters → pick → **+** → share % → repeat → **Save shares** (must total 100 %)	"100.0 %, N owner(s)"

How it connects

- `[picks]` *Project* (2); owners in *Landowner to add* (3).
- `[automatic]` lat / long puts the khasra on the **GIS map** (5) as a coloured point; a land request polygon lists the khasras whose point is inside.
- `[automatic]` *Status* changes by itself: request hand-over → *Under Acquisition*; acquisition Handover → *Acquired* / *Leased* (6).
- `[automatic]` **Shares** are what a mutation (14) transfers. Record them **before** any mutation of that owner.
- `[shows in]` case / lease / legal pickers, GIS, Landowner Register.

If refused: "This khasra / survey no. (and block) already exists in this deh" → open the existing one.

5. GIS Land Map & Land Requests

What it is: exploration draws the land it needs; three positions approve; the Land Officer takes it up. **Menu:** Overview → GIS Land Map; Land Operations → Land Requests.

#	Sign in as	Go to	Do	Result
1	`explorer`	GIS Land Map	✎ **Draw land request** → click the corners on the map, or **Paste lat/long** → paste one corner per line → **Use these corners** (or **Load KML**)	panel: acres, *Parcels inside*, warnings
2	`explorer`	same panel	**Continue: request details** → *Project* ▾, *Purpose* ▾, *Priority* ▾, *Required by*, *Justification* → **Submit to Director Operations** (or **Save as draft**, later **Send**)	REQ-2026-NNNN, *Submitted*; polygon orange
3	`dirops`	Land Requests → row → **Review**	*Decision* ▾ **Approve** → *Comment* → **Approve**	*Under Review - Regional*
4	`regmgr`	Land Requests → row → **Review**	*Decision* ▾ **Return** → *Comment* → **Return for revision** (or Approve / **Reject**)	*Returned*; requester alerted
5	`explorer`	Land Requests → row → **Edit on map**	**Clear** → new corners → **Continue: review and save** → *What changed* → **Save and send to Director Operations**	v2 polygon; back to tier 1
6	`dirops`, then `regmgr`, then `landaffairs`	Land Requests → row → **Review**	*Decision* **Approve** → *Comment* → **Approve**	*Approved* (green)
7	`lofield`	Land Requests → row → **Start land work**	*Land work* ▾ (Acquisition / Lease / Compensation case / DBPFC) → keep the tick *Mark the recorded parcels inside …* "*Under Acquisition*" → *Comment* → **Take it up**	*Handed over*
8a	`lofield`	same row → **Create acquisition**	opens Acquisition & Title with the form pre-filled → section 6	request closes by itself at Handover
8b	`lofield`	same row → **Mark land ready** (Lease / Case / DBPFC only)	*<kind> record no.* (e.g. LSE-…) → *Comment* → **Mark land ready**	*Completed*
—	requester	Land Requests → **Withdraw** (Draft / Returned)	—	*Withdrawn*

How it connects

- `[picks]` *Project* (2); corners on the map.
- `[automatic]` *Parcels inside* = khasras (4) whose point lies in the polygon; disputed / government land / overlapping requests raise warnings.
- `[automatic]` **Take it up** with the tick → those khasras (if *Proposed*) become *Under Acquisition* (`/api/requests/[id]/transition` HANDOVER).
- `[automatic]` the acquisition's stage is copied to the request (*Land work progress* in **Details**); at **Handover** the request becomes *Completed* and khasras *Acquired* / *Leased* (`lms.tg_acquisition_progress`).
- `[manual]` Lease / Case / DBPFC kinds: `lofield` creates the record in 8 / 7 / 10 himself (no pre-filled button), then comes back for **Mark land ready**.

- `[shows in]` GIS *Land requests* layer (coloured by stage), Approvals & Alerts → *Waiting on you* for each tier, *Your land requests* for the requester ("Land ready"), Calendar (*Required by*).

If refused: "the … tier is decided by a holder of that position" → sign in as that tier's account; returned requests restart at tier 1.

6. Acquisition & Title

What it is: negotiate and take the land (lease, purchase, LAA, ROW). **Menu:** Land Operations → Acquisition & Title.

#	Sign in as	Go to	Do	Result
1	`lofield`	Land Requests → **Create acquisition** (or **+ Add Acquisition**)	*Project* ▾, *Mode* ▾ (Private Lease / Direct Purchase / Government Land … / LAA 1894 Acquisition / ROW / Easement), *Area required*, *Negotiated rate (Rs / acre)*, *Target handover*, *Survey to add* → **Save**	ACQ-2026-NNNN, *Identification*
2	`lofield`	row → **Title**	tick the title checks → close	checks shown on the row
3	`nego`	row → → **Negotiation**	*Note* → **Move to Negotiation**	others see "Waiting on DM / Team Lead (Field)"
4	`dmfield`	row → → **Approval**	*Note* → **Move to Approval**	*Approval*
5	`mland`	row → → **Acquisition / Lease**	*Note* → **Move to Acquisition / Lease**	*Acquisition / Lease*
6	`sradmin`	row → → **Handover**	*Note* → **Move to Handover**	*Handover*
—	anyone who edits acquisitions	row → **Cancel**	*Reason* → **Confirm: Cancelled**	*Cancelled*

How it connects

- `[picks]` *Project* (2), khasras via *Survey to add* (4); the land request (5) when opened from **Create acquisition**.
- `[automatic]` at **Handover**: khasras → *Acquired* (Direct Purchase, LAA) or *Leased* (other modes); the linked land request → *Completed* (`lms.tg_acquisition_progress`).
- `[manual]` the award is a separate **Compensation Case** (7): `lofield` creates it; there is **no field linking** a case to an acquisition (they share the project and khasras).
- `[shows in]` Approvals & Alerts (each stage's position), request *Land work progress*, dashboards.

7. Compensation Cases

What it is: the award per owner (lease, crop, trees, other). **Menu:** Land Operations → Compensation Cases.

#	Sign in as	Go to	Do	Result
1	`lofield`	Compensation Cases	**+ Add Compensation Case** → *Project / well location* ▾, *Land used for* ▾, *Lease rate (Rs / acre / year)*, *Lease term (months)*, *Remarks*	—

#	Sign in as	Go to	Do	Result
2	`lofield`	same form	each section **+ Add line**: *Landowners* (owner, share %, Owner or attorney), *Lease lines* (survey, survey share, lease area), *Crop compensation*, *Tree compensation*, *Other compensation*	totals update
3	`lofield`	same form	*Documents seen*: tick all (CNICs, Fard, consent, bank / IBAN, photos, joint survey; + power of attorney if an attorney is payee) → **Create case**	CC-2026-NNNN, *Prepared*
4	`nego`	click the case row → → **Checked**	*Note* → **Move to Checked**	others see "Waiting on Legal Advisor"
5	`legal`	case row → → **Reviewed**	*Note* → **Move to Reviewed**	*Reviewed*
6	`sradmin`	case row → → **Verified**	*Note* → **Move to Verified**	*Verified*
7	`dmfield`	case row → → **Field Approved**	*Note* → **Move to Field Approved**	needs all documents ticked
8	`mland`	case row → → **HO Approved**	*Note* → **Move to HO Approved**	locked; **Print award sheet**
9	`mland` (not the preparer)	case row → **Adjust award**	*Change (Rs)*, *Reason* → **Confirm adjustment**	enhancement / decree / correction

How it connects

- `[picks]` *Project* (2), owners (3), khasras on each line (4).
- `[automatic]` lease lines reserve the parcel area; a parcel cannot be committed twice (`tg_case_term_commitment`).
- `[automatic]` vouchers (12) against this case cannot exceed the award; payees must be case owners.
- `[automatic]` an applied mutation (14) moves the seller's **unpaid** share to the buyer / heirs (parcel-wise) and holds his unreleased vouchers.
- `[manual]` no field links a case to an acquisition (6) or a land request; for a request handed over as "Compensation case", `lofield` enters the CC code in **Mark land ready** (5).
- `[shows in]` Approvals & Alerts, Payments → Liabilities tab, Landowner Statement (3), dashboards.

If refused: "Missing documents: …" → case row → **Document checklist** → tick → retry.

8. Leases & Agreements

What it is: surface lease and yearly rent. **Menu:** Land Operations → Leases & Agreements.

#	Sign in as	Go to	Do	Result
1	`lofield`	Leases & Agreements	**+ Add Lease** → *Project / well location* ▾, *Lease kind* ▾, *Initial area (acres)*, *Lessor (landowner)* (type 3 letters → pick), *Survey parcel (optional)*, *Start date*, *Term (years)*, *Annual rent (Rs)*, *Escalation (% / yr)* → **Save**	LSE-NNNNN, *Draft*
2	`sradmin`	lease row → → **Under Review**	*Note* → **Move to Under Review**	*Under Review*

#	Sign in as	Go to	Do	Result
3	`mland`	lease row → → **Approved**	*Note* → **Move to Approved**	*Approved*
4	`lofield` / `sradmin` / `mland`	lease row → **Hold** (or **Release**)	*Reason* → **Place hold** (or *Release justification* → **Release hold**)	on hold: rent vouchers and renewal blocked
5	same	lease row → **Renew**	*Extension (years)*, *Renewal note* → **Renew**	new end date, escalated rent

How it connects

- `[picks]` *Project* (2), *Lessor* (3), *Survey parcel* (4).
- `[automatic]` an **Approved** lease blocks the parcel for that period (`tg_lease_propagate`); a lease **Hold** puts all its vouchers on hold (12).
- `[automatic]` an applied mutation (14) moves the seller's lessor role on active leases to the buyer / heirs.
- `[manual]` for a land request handed over as "Lease", `lofield` enters the LSE code in **Mark land ready** (5).
- `[shows in]` Calendar (*Lease Expiry*), Executive Dashboard (lease expiry alerts), Payments (*Lease Rent* vouchers), **Print** (agreement summary, *Print Lease Deed*).

9. ROW & Pipelines

What it is: pipeline / road right of way. **Menu:** Land Operations → ROW & Pipelines.

#	Sign in as	Go to	Do	Result
1	`lofield`	ROW & Pipelines	**+ Add ROW Corridor** → *Project* ▾, *Corridor name*, *Type* ▾, *Agreement date*, *From*, *To*, *Length (m)*, *Width (m)*, *Tenure (years)*, *Annual rent (Rs)*, *Obligations* → **Save**	ROW-NNNN, area = length × width
2	`sradmin`	row → → **Under Review**	*Note* → **Move to Under Review**	—
3	`mland`	row → → **Approved**	*Note* → **Move to Approved**	—
—	editor	row → **Stop**	*Reason* → **Confirm: Stopped**	—

How it connects

- `[picks]` *Project* (2) only; the form has no khasra picker.
- `[none]` no automatic effect on khasras. (Khasras become *Leased* through an **acquisition** with mode *ROW / Easement*, section 6.)
- `[manual]` an encroachment on the corridor is reported in 15 (*Or a ROW corridor*).
- `[shows in]` Calendar (*ROW Renewal*), dashboards.

10. DBPFC — Sindh Govt Land

What it is: government land priced by the District Board committee. **Menu:** Finance → DBPFC — Sindh Govt Land.

#	Sign in as	Go to	Do	Result
1	`lofield`	DBPFC — Sindh Govt Land	**+ Add Estimate** → *Sindh project* ▾, *District* ▾, *Area*, *Estimated rate (Rs / acre / year)*, *Remarks* → **Save**	DBP-NNNN, *Estimated*
2	`sradmin`	row → → **Referred to DBPFC**	*Note* → **Move to Referred to DBPFC**	—
3	`mland`	row → **Record rate**	*Fixed rate (Rs / acre / year)*, *Committee reference*, *Meeting date* → **Save rate**	rate recorded (does not move the stage)
4	`mland`	row → → **Rate Fixed**	*Note* → **Move to Rate Fixed**	*Rate Fixed*

How it connects

- `[picks]` *Sindh project* (2), *District*.
- `[automatic]` only Manager Land may record the fixed rate (`tg_dbpfc_rate_authority`); each change is kept in the rate history.
- `[manual]` payment: `lofield` raises a voucher (12) with the payee = the government office; WHT is what the voucher states (default 0 %, the payee is not a landowner).
- `[automatic]` a land request (5) over *Government* land shows a DBPFC warning.

11. Budgets

What it is: approved money per project and year. **Menu:** Finance → Budgets.

#	Sign in as	Go to	Do	Result
1	`mland` (or `finance`)	Budgets	**+ Add Budget** → *Project* ▾, *Fiscal year*, *Approved amount (Rs)*, *Approval reference*, *Remarks* → **Save**	BGT-NNNN
2	same	row → **Revise**	new amount → **Save**	—

How it connects

- `[automatic]` at voucher **Verify** (12), if the project has a budget for the year of the voucher's *Period from*, a voucher that would take it over the budget is refused (`lms.wf_guard_payments`).
- `[shows in]` Payments reconciliation warning "over budget", dashboards.

12. Payments & Cheques

What it is: voucher → verify → cheque → receipt. **Menu:** Finance → Payments & Cheques.

#	Sign in as	Go to	Do	Result
1	`lofield`	Payments & Cheques	**+ Request Payment** → *Project* ▾, *Case (optional)* ▾, *Payee (landowner)* (3 letters → pick), *Category* ▾, *Pay type* ▾, *Payment mode* ▾, *Land class* ▾, *Period from* / *Period to*, *Gross amount (Rs)*, *Remarks* → **Request**	VCH-2026-NNNNN, *Requested*; WHT and net shown
2	`finance`	voucher row → **Verify**	*Note* → **Verify**	*Verified*

#	Sign in as	Go to	Do	Result
3	`mland`	voucher row → **Release cheque**	*Cheque date* → **Confirm release** (password again if > 10 min)	*Released*, CHQ-…
4	`finance`	Cheques tab → **Record receipt**	*Receipt no.*, *Received on*, *Acknowledged by*, *Their CNIC* → **Save** → **Print receipt**	RCPT-…
5	`finance` (or `lofield`)	Liabilities tab → case row → **Allocate voucher**	*Voucher* ▾, *Amount (Rs)* = the **net** amount, *Note* → **Allocate**	case settled by that amount
6	`finance` / `mland`	Holds tab → **Place hold**	*Hold applies to* ▾ (landowner / case / voucher / …), *Which*, *Reason* → **Place hold**	voucher shows *On hold*
7	`finance` / `mland`	Holds tab → hold row → **Lift hold**	*Why it can be lifted* → **Lift hold**	(court-stay holds: **Lift on the legal case**, 13)
8	`finance`	voucher row → **Cancel voucher**	*Reason* → **Cancel voucher**	*Cancelled* (its own holds lifted first)
9	a release holder who did not release it	Cheques tab → **Reverse release**	reason → **Confirm reversal**	cheque reversed

How it connects

- `[picks]` *Project* (2), *Case* (7), *Payee* (3); lease (8) and DBPFC (10) vouchers carry their record.
- `[automatic]` WHT: Filer 10 %, Non-Filer 20 %, set by the database from the owner's tax status.
- `[automatic]` holds come from: a legal **stay** (13), a lease **Hold** (8), a **mutation** (14), or a manual hold; any hold blocks Verify and Release.
- `[automatic]` vouchers on a case cannot exceed the award; budget checked at Verify (11); the raiser / verifier cannot release.
- `[shows in]` Landowner Statement (3), receipts, Reports, dashboards (paid vs approved), Reconciliation tab.

If refused: "Payment is on hold: …" → lift the stay (13) or **Lift hold**; "at most … can still be requested" → lower the gross.

13. Legal & Litigation

What it is: court cases; a stay order stops payments. **Menu:** Land Operations → Legal & Litigation.

#	Sign in as	Go to	Do	Result
1	`legal`	Legal & Litigation	**+ Add Legal Case** → *Province* ▾, *Project* ▾, *Court case no.*, *Court*, *Case type* ▾, *Company is* ▾, *Status* ▾, *Parties*, *Filed on*, *Parcels concerned* (*Parcel to add* → pick), *Landowners concerned* (*Landowner to add* → pick), tick **Stay order in force** → **Save**	LIT-NNNN, *Stay order*
2	`legal`	row → **Hearing**	*Hearing date*, *Proceedings*, *Next date* → **Save**	next hearing in Calendar
3	`mland`	row → **Update**	*Status* ▾, untick **Stay order in force (holds payments)**, *Court order lifting the stay* → **Save**	holds lifted

How it connects

- `[picks]` *Project* (2), parcels (4), landowners (3).
- `[automatic]` stay in force → a payment hold on every linked landowner and parcel; stay ended → those holds lifted (`lms.tg_legal_case_stay`).
- `[automatic]` only a payment-hold holder (Manager Land) may lift a stay (`tg_legal_stay_authority`), not the Legal Advisor.
- `[shows in]` Payments → Holds tab and voucher *On hold* (12), Calendar (*Court Hearing*), Inbox notifications.

If refused: "lifting a court stay … needs the authority that places and lifts payment holds" → sign in as `mland`.

14. Mutation & Succession

What it is: sale, inheritance, gift or partition of a share. **Menu:** Land Operations → Mutation & Succession.

#	Sign in as	Go to	Do	Result
0	`lofield`	Survey / Khasra Register (4)	check the transferor's **Shares** are recorded	—
1	`lofield`	Mutation & Succession	**+ Add Mutation** → *Type* ▾, *Transferor (current owner)* (3 letters → pick), **+ Add transferee** (or heir): *Heir*, *Relation*, *Share* (total 100) → **Save**	MUT-NNNN, *Initiated*; *Surveys* filled from his shares
2	`sradmin`	row → **Revenue record**	*Revenue mutation no.*, *Mutation date*, *Revenue office* (+ *Succession certificate no.* for Virasat) → **Save**	—
3	`sradmin`	row → → **Revenue Verified**	*Note* → **Move to Revenue Verified**	—
4	`legal`	row → → **Legal Cleared**	*Note* → **Move to Legal Cleared**	—
5	`mland`	row → → **Approved & Applied**	*Note* → **Move to Approved & Applied**	transfer applied
6	any	row → **Details**	*Payments re-pointed* list	—

How it connects

- `[picks]` *Transferor* and heirs / transferees (3); khasras come from the transferor's shares (4).
- `[automatic]` on *Approved & Applied* (`api.apply_mutation` → `lms.mutation_repoint_payments`): shares move on the khasras; the seller's **unpaid** share on open cases (7) and his lessor role on active leases (8) move to the buyer / heirs, parcel by parcel; his unreleased vouchers go **on hold** (12).
- `[manual]` `finance` then **Cancel voucher** (or **Lift hold**) on the held vouchers, and `lofield` raises new vouchers for the buyer.

If refused: "Select the holdings to transfer." → the transferor had no shares when it was saved: record shares, **Cancel** this mutation, create it again.

15. Encroachments

What it is: someone occupying company land or a corridor. **Menu:** Land Operations → Encroachments.

#	Sign in as	Go to	Do	Result
1	`lofield`	Encroachments	**+ Report Encroachment** → *Project* ▾, *Survey parcel* ▾ **or** *Or a ROW corridor* ▾, *Category* ▾, *Risk* ▾, *Detected on*, *Encroacher*, *Area affected*, *Latitude / Longitude*, *Description*, *Impact*, *Corrective action* → **Save**	ENC-2026-NNNN, *Reported*
2	`sradmin`	row → → **Assessed**	*Note* → **Move to Assessed**	(not `lofield`: he reported it)
3	`dmfield`	row → → **Action Approved**	*Note* → **Move to Action Approved**	—
4	`legal`	row → → **Legal Follow-up**	*Note* → **Move to Legal Follow-up**	required step, even if no court case
5	`mland`	row → → **Resolved**	*Note* → **Move to Resolved**	(DM already acted, so Manager Land closes)

How it connects

- `[picks]` *Project* (2), a khasra (4) **or** a ROW corridor (9).
- `[none]` no automatic effect elsewhere: it does not hold payments or change the khasra.
- `[manual]` court action: sign in as `legal` → Legal & Litigation → **+ Add Legal Case** with the same project and *Parcels concerned* = the khasra. There is **no field linking** the legal case back to the encroachment; quote the ENC code in *Parties* or *Remarks*.
- `[shows in]` Approvals & Alerts (each stage's position), Dashboards (open / high-risk counts), Reports.

16. Grievances & IIR

What it is: a complaint from a landowner or the community. **Menu:** Community → Grievances & IIR.

#	Sign in as	Go to	Do	Result
1	`lofield`	Grievances & IIR	**+ Add Grievance** → *Province* ▾, *Type* ▾, *Complainant*, *Complainant CNIC*, *Mobile*, *Project* ▾, *Category* ▾, *Severity* ▾, *Channel* ▾, *Due date*, *Description* → **Save**	GRV-2026-NNNN, *Registered*
2	`dmfield` (or `mland`)	row → → **Assigned**	*Note* → **Move to Assigned**	—
3	`nego` (or `legal` / `sradmin`)	row → → **In Progress**	*Note* → **Move to In Progress**	(not `lofield`: he registered it)
4	`sradmin` (or `legal`)	row → → **Resolved**	*Note* → **Move to Resolved**	**(to confirm)** the database requires a *Resolution* text for Resolved, and this screen has no Resolution box, so the step is refused today. Stop the demo at *In Progress*.
5	`mland`	row → → **Closed**	*Note* → **Move to Closed**	—

How it connects

- `[picks]` *Project* (2) only. The complainant is typed text, not a landowner record.
- `[none]` no automatic effect on payments or cases.
- `[manual]` if it is about a payment: check the owner's **Statement** (3) and the voucher (12) yourself.
- `[shows in]` Approvals & Alerts, the row shows overdue against the **15-day** target, dashboards.

17. Documents

What it is: files attached to any record. **Menu:** Records & Reports → Documents.

#	Sign in as	Go to	Do	Result
1	`lofield`	Documents	**+ Upload Document** → *Record type* ▾ (Project, Survey, Landowner, Compensation case, Lease, ROW corridor, Acquisition, Legal case, Mutation, Encroachment, Grievance, Payment voucher, DBPFC estimate), *Record* (pick), *Category* ▾, *File* (≤ 50 MB) → **Upload**	DOC-NNNNN
2	any reader	row → **Download**	—	the download is logged
3	editor	row → **Archive**	*Reason* → **Archive**	hidden from the list

How it connects: `[picks]` the record chosen in *Record*. `[shows in]` Audit Trail → document access tab (20).

18. Data Upload (Import)

What it is: bulk load of landowners or khasras from a CSV. **Menu:** Records & Reports → Data Upload.

#	Sign in as	Go to	Do	Result
1	`lofield`	Data Upload	**+ Upload file** → *Into* ▾ (Landowners / Survey / khasra register), *Province* ▾, *File* → upload	batch *Uploaded*
2	`lofield`	batch row → **Validate**	errors listed per row; fix the file and upload again	—
3	`sradmin` / `dmfield` / `mland`	batch row → **Promote <N>** (number of valid rows)	—	records created in 3 or 4

How it connects: `[automatic]` promoted rows become normal landowners (3) / khasras (4).

19. Approvals & Alerts, Calendar

Menu: Overview → Approvals & Alerts; Overview → Calendar.

#	Sign in as	Go to	Do	Result
1	any approver	Approvals & Alerts → **Waiting on you**	click the row → **Open record** (or **Comment**)	the record's screen
2	requester	Approvals & Alerts → *Your land requests*	read "Returned" / "Land ready"	—

#	Sign in as	Go to	Do	Result
3	any	Calendar	click an entry → **Open record**	—

How it connects: `[shows in]` *Waiting on you* lists every record whose next step belongs to your position (cases, acquisitions, mutations, leases, ROW, DBPFC, payments, encroachments, grievances, land requests). Calendar shows *Lease Expiry*, *ROW Renewal*, *Court Hearing* and land-request *Required by* dates.

20. Reports, Landowner Register, Dashboards, Audit Trail

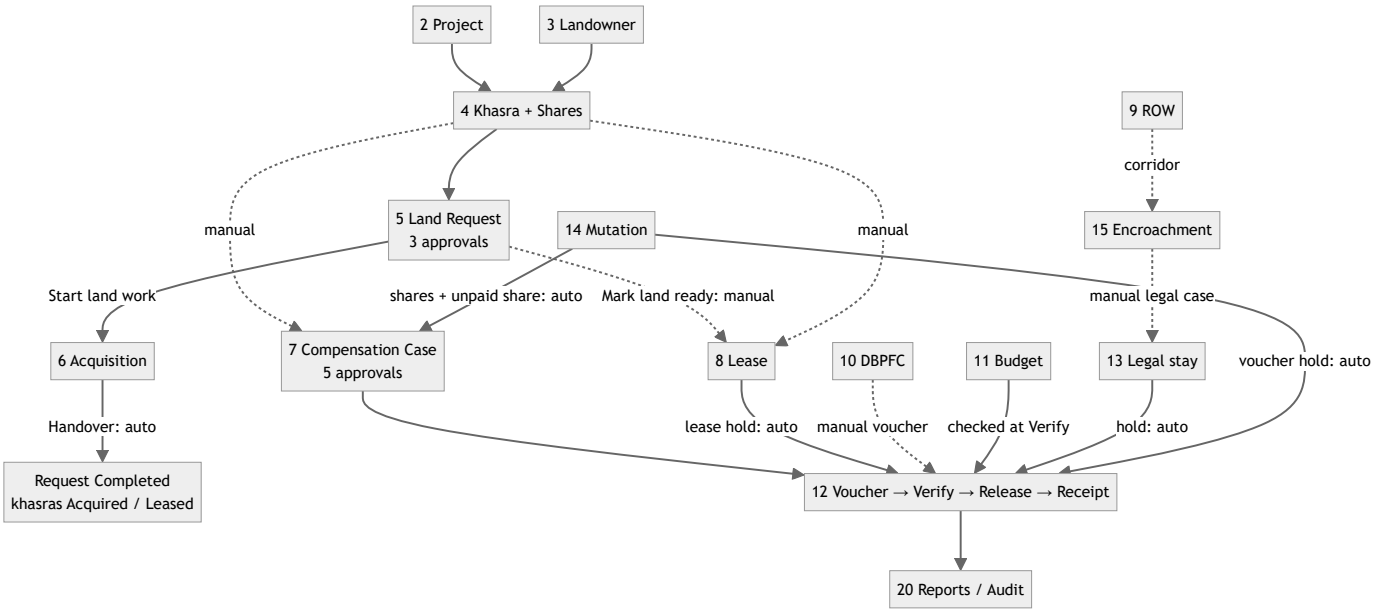

#	Sign in as	Go to	Do
1	`mland`	Overview → Executive Dashboard / Project Dashboard	KPIs, province chart, lease expiry, recent cases; click a row for details
2	`mland`	Records & Reports → Reports	pick a report → filters → **PDF / Excel / CSV**
3	`mland`	Records & Reports → Landowner Register	*Province* → *District* → *Taluka* → *Deh*, owner / tax filters, *Area unit*, grouping → export
4	`audit`	Records & Reports → Audit Trail	search a code (e.g. CC-…) → click a row: old and new values; tabs: events, versions, authentication, document access

21. Settings

#	Sign in as	Go to	Do	Result
1	`admin`	System → Settings → **Land units**	per province **Change list…** (units offered on forms), **Set size…** (local size, e.g. Ghunta; *Source / note*) → **Save**, or **Use the national size**	new khasras use it; old khasras keep the size they were recorded with

End-to-end link map

Solid arrow = the system does it; dotted = a person does it in the other module.

When something is refused

Message (start)	Cause	Fix
Missing documents: …	Case documents not ticked	Case row → **Document checklist** → tick → retry
Select the holdings to transfer.	Mutation saved before the transferor's shares existed	Record **Shares** (4); **Cancel** the mutation; create it again
the X step is for: … You hold: …	Wrong position for this step	Sign in as the account in the step table
segregation of duties: you prepared … / already approved …	Same person on two steps	Use the next account in the table
Payment is on hold: …	Stay order, lease hold, mutation or manual hold	`mland` lifts the stay (13) or **Lift hold** / **Cancel voucher** (12)
Budget check failed: …	Voucher takes the project over its budget	**Revise** the budget (11) or lower the gross
… at most X can still be requested	Vouchers would exceed the award	Lower the gross, or **Adjust award** (7)
the landowner is recorded as deceased …	Deceased payee	Virasat mutation first (14)
Save shares stays disabled	Shares ≠ 100 %	Correct the percentages
A landowner with this CNIC is already registered.	Duplicate CNIC	Open the existing owner
This khasra / survey no. … already exists …	Duplicate khasra	Open the existing parcel
Not found / outside your province access	Record in another province	Province chip, or that province's account
lifting a court stay … needs the authority …	Legal Advisor tried to lift a stay	Sign in as `mland`
the transferor holds no share of parcel …	No share on that khasra	Check **Shares** (4)
Password asked again	Sign-in older than 10 min	Re-enter the password
