LMS Demo Data Sheet (fresh data set)

Copy-paste values for every module, in the same order and numbers as **08 Module Workflow Quick Reference** (08 shows where to click; this sheet shows what to type). Every name, CNIC, khasra and code here is invented and does not clash with data already in the system (checked against `lms_dev` on 3 Nov 2026).

Rehearsed on 3 Nov 2026 against a copy of lms_dev: 76/76 steps passed (every step below, through the app's own API, with the accounts named); the encroachment and grievance approval chains were added afterwards and checked in the database on 3 Nov 2026 (rolled back).

Before you start

#	Item	What to do
1	Site	Live: `https://land-management.alisonstech-dev.com`. Local: `http://localhost:3040`.
2	Backup first	Live (VPS): `export PATH="$HOME/pg18/bin:$PATH"; PGPASSWORD="$(cat ~/.pg_super_pw)" pg_dump -h 127.0.0.1 -p 5433 -U postgres -Fc -d lms_prod -f ~/backups/before_demo_$(date +%F).dump`. Local: `pg_dump -Fc -d lms_dev -f backups/before_demo.dump`.
3	Browser	One **incognito window per account**, or **Sign out** (top-right name → Sign out) between accounts. Choose **Sindh** on *Select province*.
4	Codes	Codes below are **e.g.**: the real number depends on what already exists (on live they will be higher). Carry on with whatever code the screen shows.
5	Dates	Type dates as `DD/MM/YYYY` in the date boxes.
6	Order	Do the sections in order. Section 4 (shares) must be done **before** section 14 (mutation).
